

THEHCO GREEN TECH INSTALLATION

PROCESS DEMONSTRATION

(TGT MEDIUM/SMALL)

INJECTION PUMP

FUEL TANK

1

The original flow is from fuel tank to fuel filter then supply to injection pump of the engine.

INJECTION PUMP

TGT Device

2
Fuel line flow

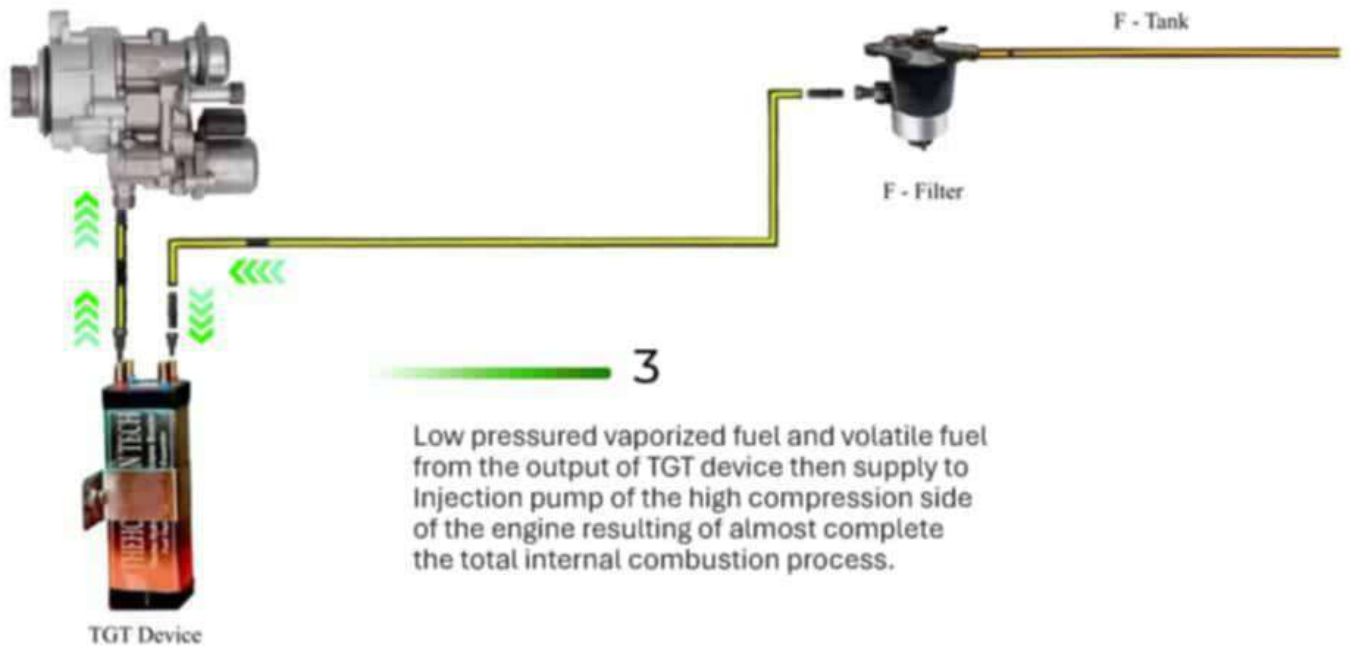

F - Filter

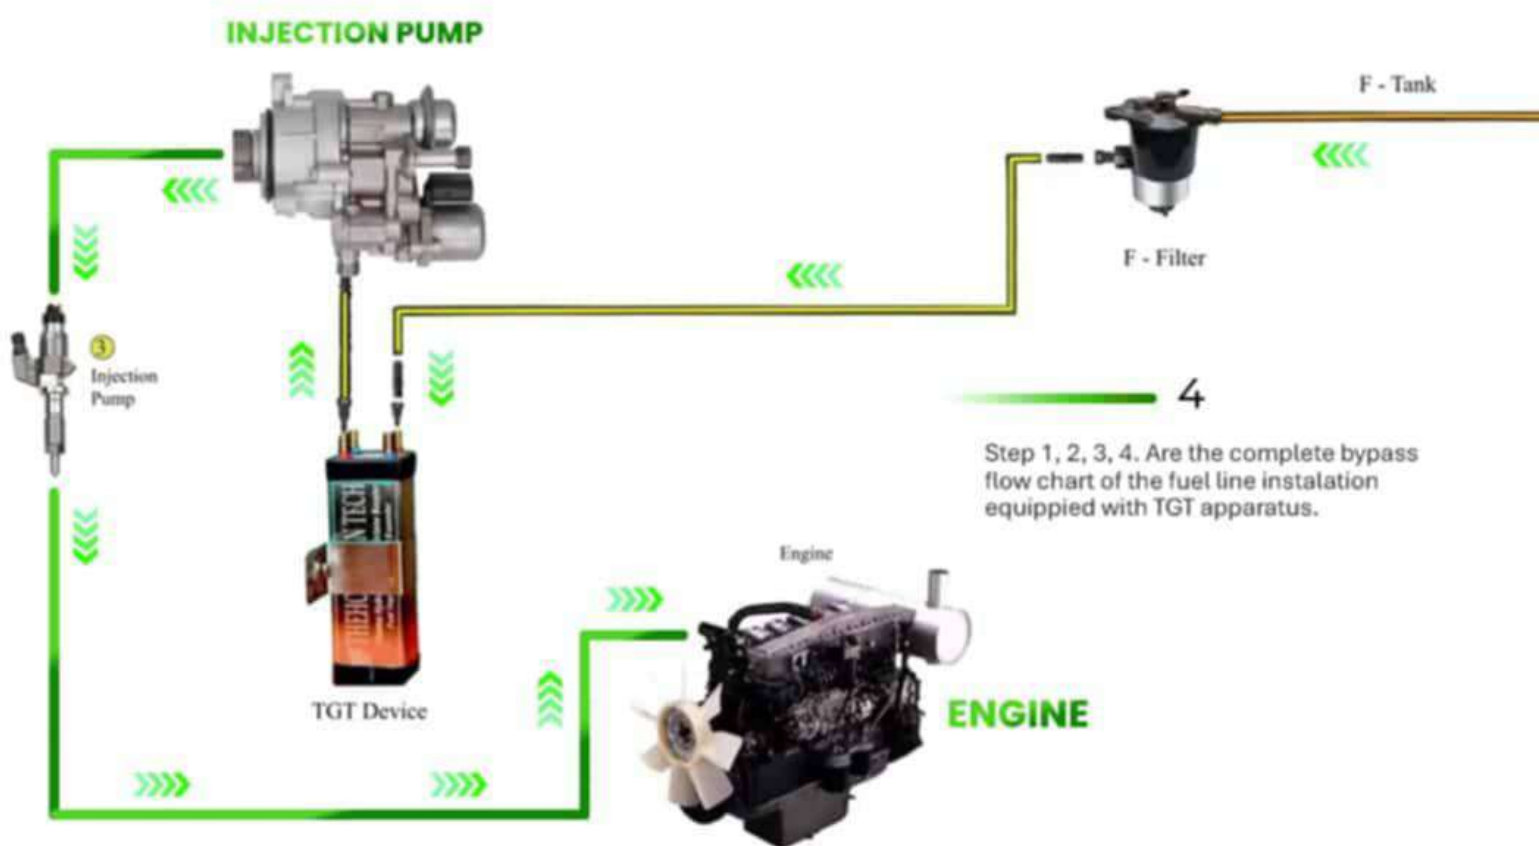

F - Tank

INJECTION PUMP

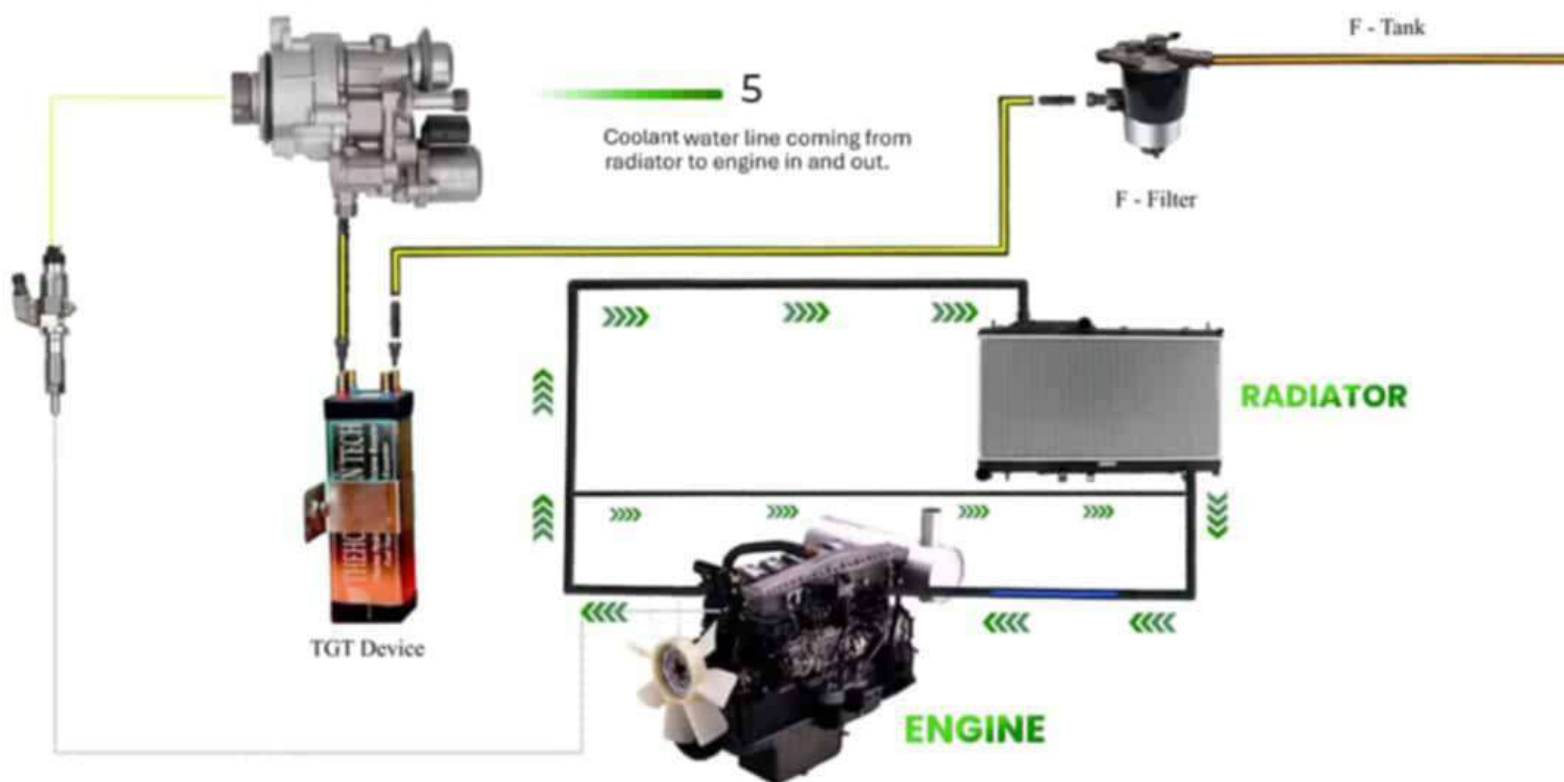

Low pressured vaporized fuel and volatile fuel from the output of TGT device then supply to Injection pump of the high compression side of the engine resulting of almost complete the total internal combustion process.

Step 1, 2, 3, 4. Are the complete bypass flow chart of the fuel line instalation equipped with TGT apparatus.

INJECTION PUMP

INJECTION PUMP

6

The complete bypass flow chart of the water from engine to inlet and outlet of the TGT apparatus and back to radiator or reservoir system.
